ARCHITECTURAL PLANS

This guide includes only architectural plans of buildings. Plans of bridges are not included but form part of a guide to maps & plans of roads & bridges now in preparation. The guide also excludes engravings & other illustrations of buildings which also form the subject of a forthcoming guide. Facsimile copies of engravings & prints of many important houses in the county, including fine engravings by Johannes Kip (1653-1722) and Samuel Buck (1696-1779), are available for study in the searchroom. Ground plans, elevations & something approaching perspective drawings of buildings can also sometimes be found on estate maps. A map of the Aske estate in 1761 has a fine drawing of the south east prospect of Aske Hall in the top right hand corner. Plans of less grand buildings can also be shown as, for example, on Harman's map of Richmond which shows elevations of many of the individual buildings in the town. Guide No. 3, a detailed list of all the maps available at the North Yorkshire County Record Office, is available for purchase.

This guide is arranged in alphabetical order of townships or civil parishes.

Copies of most of the plans which appear in this list can be provided in accordance with current reprography charges in the form of facsimiles made from microfilm (usually called print-outs) on A4 or A3 size sheets. A plan which is larger than A3 size normally has to be reproduced on several sheets.

References to original documents are included in this list but the more important references for most users is the microfilm reference which appear on the far right hand side of the page.
